## **COMBINED LIST of Particularly Hazardous Substances**

revised 1/3/18

list compiled by Hector Acuna, UCSB

If any of the chemicals listed below are used in research then complete a Standard Operating Procedure (SOP) for the product as described in the Chemical Hygiene Plan.

Material(s) not on the list does not preclude from completing an SOP. Other extremely toxic chemicals or other high hazards will require the development of an SOP.

Red= added in 2017

IARC list 1 are Carcinogenic to humans

IARC list Group 2A Probably carcinogenic to humans IARC list Group 2B Possibly carcinogenic to humans

Prop 65 known to cause cancer or reproductive toxicity

KNOWN Carcinogens from National Toxicology Program (NTP)

Reasonably Anticipated NTP
