# Setting up Rstudio Projects and Github

Marc, Aparna, and Isaac

July 30, 2016

# 1 Introduction

## 1.1 Rational

**Almost Universal Compatibility** No downloading programs on personal computers.

**Accessibility** Accessible from any computer via webserver

**Collaboration**

**Version Control**

# 2 Rstudio

## 2.1 Local Install versus Server

# 3 Create Version Control for Rstudio as a Collaborator

**Create Github Account**

**Accept Collaborator Invitation**

**Make SSH Key on Rstudio Sever** Using... Profile

**Add SSH Key to Github** Copy and Paste...

**Clone** shared project and paste into New Project on R Studio Server

# 4 Creating a New Project

# 5 Working on Projects

## 5.1 Best Practices

**Pull**

**Commit**

**Push**
